

Anja Paulič works at the Archives of the Republic of Slovenia as an archivist – senior adviser, focusing mainly on the issues of access in the archival process. She has actively participated in several national and European projects: she led the WP5.2 task in the E-ARK project and is currently involved in the eArchiving Building Block (E-ARK3 project), working on eHealth2 specification (archiving cancer registry exports). In the ongoing e-ARH.si project, whose aim is to establish Slovenian public electronic archival network, Anja is a member of three work packages concerning appraisal, ingest and access. She has a special interest in archiving and the use of health and geo-spatial data and is active in the DLM Geoforum.
