

Anssi Jääskeläinen works at the South-Eastern Finland University of Applied Sciences as a research manager. He possesses a PhD and an MSc from Lappeenranta University of Technology related to IT, telecommunications and User Experience. He also has a professional teacher proficiency.

For the past ten years, he has been working in practical projects aiming at increasing data usability, long term preservation and data visualization with modern 3D - techniques. In addition to spoken language, Anssi “speaks” Python, C# and Java quite fluently. His motto: If something needs to be done more than once, it should be automated.
